

Ecodesign Initiative for Medical Imaging 6th Annual Forum

Wednesday 15 March 2017 – 14:00/16:00
COCIR Bvd. A. Reyers 80 – 1030 Brussels, Belgium

Background

On 28 May 2008 COCIR presented to the European Commission its first proposal for an industry-led Self-Regulatory Initiative (SRI) on Ecodesign for medical imaging equipment. In November 2009 the methodology and a pilot project on ultrasound equipment were submitted, and comments were gathered for further improvement. In February 2012 the revised SRI was published. On November 2012 the Commission officially acknowledged the Initiative recognizing its benefits for environment.

Since 2010 The SRI Steering Committee applied the SRI Methodology to MRI, CT, X-Ray, Ultrasound and Nuclear Imaging equipment, developed measurement standards and Guidance for users on saving energy.

In 2016 the SC presented its plans to include Circular Economy elements into the SRI methodology as experience proved that resource efficiency can bring higher benefits than energy efficiency alone.

Objective

The objective of the Annual Forum 2017 is to present and discuss the achievements 2016 for Magnetic Resonance equipment and developments of the new draft methodology to measure the Circularity of the medical imaging device business model.

Meeting documentation and information will be made available on the COCIR website [dedicated page](#) prior to the meeting.

Participants

The forum is open to:

- Representatives from the European Commission
- Members of the Ecodesign Consultation Forum
- Companies actively involved in Self-Regulatory Initiatives
- Companies active in the medical imaging area
- Interested parties

Registration

For logistical reasons, please register **by 3 March 2017 at the latest** by clicking [here](#) or by email to:

Riccardo Corridori - COCIR SRI Steering Committee Secretariat

Ecodesign Initiative for Medical Imaging 6th Annual Forum

Wednesday 15 March 2017 – 14:00/16:00
COCIR Bvd. A. Reyers 80 – 1030 Brussels, Belgium

PROGRAMME

13:30 – 14.00	Registration
14:00 - 16.00	Welcome and Introduction
	Achievements 2016 for MRI
	Measuring Circularity of Economy (results of the survey on feasibility and data collection)
	Ecodesign – Standardization in the medical sector
	Discussion, Question&Answers
